

🌐 Web Development Diploma - C.F.A Academy

🚀 Master Web Development from Frontend to Backend

🔗 Program Overview:

This diploma is designed to equip you with the skills needed to become a professional web developer. The program covers both frontend and backend development, providing hands-on experience through real-world projects.

🔗 Curriculum Breakdown:

1. Frontend Development:

HTML5 & CSS3 – Learn to structure and style modern websites.

JavaScript – Add interactivity and dynamic behavior to your sites.

Bootstrap – Build responsive, mobile-friendly layouts.

ReactJS – Develop advanced and scalable web applications.

2. Backend Development:

Java SE & Java EE & Spring boot– Create robust server-side applications.

APIs & Databases – Connect your frontend to the backend using RESTful APIs.

SQL & NoSQL – Manage and interact with relational and non-relational databases.

3. Full-Stack Projects:

Develop real-world projects integrating frontend and backend technologies.

Work with Git and deployment tools to launch live applications.

◆ Who is This For?

Beginners looking to enter the web development field.

Developers aiming to upgrade their skills to full-stack development.
